## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on July 25, 2007 has been entered.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claim 11 is rejected under 35 U.S.C. 102(e) as being anticipated by Agraharam et al (US Patent 6,407,988 B1).

Regarding to claim 11, Agraharam discloses a method (fig. 2-3) of involving a wireless network comprising a home agent 104.1 and a foreign agent 104.2 associated with a mobile station 100.1, the method comprising determining, at the foreign agent, that at least one packet received from the mobile station is to be routed to a service provider 150 (col. 5 lines 45-54); determining whether packets received from the service provider are to be routed to the home agent based on service provider address indicated in the received packet (col. 5 lines 27-33); and modifying the packet received from the mobile station so that packets transmitted from the service provider to the mobile station bypass the home agent when the foreign agent determines that packets received from the service provider are to bypass the home agent (col. 5 lines 63-col. 6 lines 1-6).

***Allowable Subject Matter***
